PROVIDE EXCELLENT  
TRACTION FOR ROW CROP  
TRACTORS AND  
IMPLEMENTS**

**CROP FARMING**  
SEGMENT

**MICHELIN**

## 1 TRACTION

### Excellent traction and lateral stability

Robust crown and deep tread bars. Extra-deep 40° lugs provide impressive traction and excellent directional control, thanks to the wide contact patch for low soil compaction.

## 2 SOIL PROTECTION (COMPACTION)

### Deep R1W lug design for a long tread life

Additional lugs promote slow tire wear and long service life under heavy loads at road speeds. Stabilizing crown belts reduce lug movement, ensuring smooth even wear.

## 3 LOAD CAPACITY

### Extra-strong but super-flexible casing

Offers a large footprint and surprising ride comfort, has excellent durability to carry extra-heavy loads.

## TIRE CHARACTERISTICS

## ADDITIONAL INFORMATION

### APPLICABLE VEHICLES

The MICHELIN AGRIBIB RC traction performance allows you to go into the fields for spraying even when it's muddy. It's very good because the treatment windows are getting smaller and smaller.
