MICHELIN X STACKER 3 HD

1 DURABILITY

Extra service life in heavy duty conditions ⁽¹⁾

Radial structure optimized to endure heavy duty cycles.

2 PRODUCTIVITY

Drive up to 7.5 miles in an hour at 16 mph with reach stackers and container handlers ⁽²⁾

Radial technology is usually the best alternative for operations requiring more productivity with the transport of more tons per hour.

3 LONGEVITY

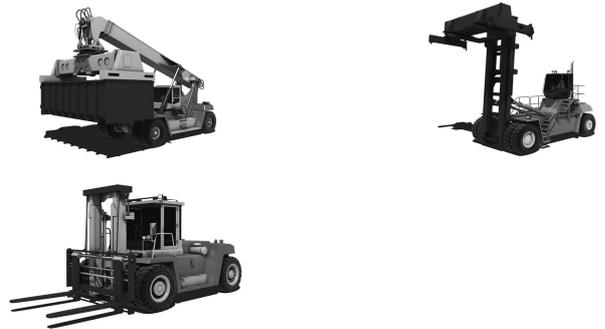

Reduce downtime with reliable wear life projection ⁽³⁾

Tread wear indicator is now optimized to secure wear life projection and allows to plan the maintenance accordingly.

TIRE CHARACTERISTICS

ADDITIONAL INFORMATIONS

APPLICABLE VEHICLES

Port operators with large fleets of reach stackers operate under tough conditions. They seek tires that minimize unexpected machine downtime and meet their productivity challenges.

Industrial and Port Tires Product Manager
Michelin Group

(1) Compared to Michelin XZM2+ and Michelin XZM2+A that may be removed with 40% rubber remaining under severe conditions. Michelin X STACKER 3 HD removed after being 100% worn, resulting in up to 30% extra life time. Data based on quality records, obtained from port operators, between 2017 and 2022.

(3) Compared to MICHELIN® 18.00R25 XZM2+/XZM2+A and X STACKER 2 LC. Field study in real life conditions made by Michelin during 7 years in a representative panel of operating terminals in Australia, Europe and Middle East; same size and usages.
