MICHELIN

MICHELIN X AGV EV

1 DURABILITY

Optimize machine uptime

New generation of radial tire, developed to ensure maximal reliability on automated machines.

2 LONGEVITY

Improve service life ⁽¹⁾

Smooth pattern designed with specific rubber compound for an optimized tire life.

3 ENERGY EFFICIENCY

Get up to 40% reduction in rolling resistance ⁽²⁾

Specifically designed radial structure with low resistance overall rubber compounds.

TIRE CHARACTERISTICS

ADDITIONAL INFORMATION

APPLICABLE VEHICLES

Energy efficiency and productivity drive port operation competitiveness. Automated systems and port electrification meet this demand, requiring tires for seamless, energy-saving, and durable operations. Our MICHELIN X AGV EV tires support these challenges.

Industrial and Port Tires Product Manager
Michelin Group

(1) Expect to be in operations over 20,000 hours / 4 years under standard operation. Tire tested in real conditions, port of Rotterdam, from 2020 to 2021.
(2) Compared to premium BIAS and Radial tires on AGV market. Rolling resistance measured at the Michelin Center, in Ladoux, France from 2020 to 2021.
