COMPACTORS**

**SITE PREPARATION (EXCAVATION /
EARTH MOVING / SURVEYING)**
SEGMENT

MICHELIN

MICHELIN X Lisse Compacteur

1 SOIL PROTECTION (COMPACTION)

The specific build of the crown enables the tire to resist the heat of the asphalt. Its durable shoulders and tread surface provide better resistance to cuts and punctures

2 DURABILITY

Lower operating costs
Michelin's radial build increases the service life of the tire. Wear indicators located on the tread surface make it easier to assess tread wear.

3 PRODUCTIVITY

No rolling marks on the surfacing thanks to smooth tread surfaces and rounded shoulders
Radial tire that provides constant pressure along the ground contact area to get your job done.
