## **INTRODUCING THE VISUAL PRESSURE CONTROL**

Integrated into the tire design, the *Visual Pressure Control* provides a direct visual reference of correct pressure.<sup>(5)</sup> This innovation supports proper tire pressure management by delivering a fast, user-friendly solution without relying on external systems or electronic devices.

### **KEY BENEFITS**

#### **Quick and easy pressure check**

The *Visual Pressure Control* allows operators to check tire pressure without stopping operations for complex inspections.

#### **A practical pressure helper**

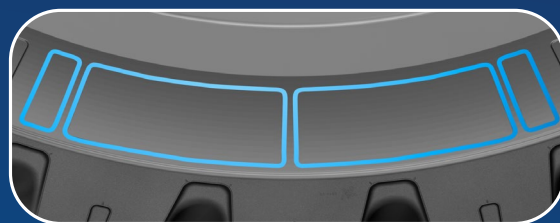

The *Visual Pressure Control* acts as a clear guide, showing exactly when the right pressure level is reached — helping avoid under- or over-pressure.

#### **No technology required**

No sensors, no electronics, no tools. The *Visual Pressure Control* works purely visually, making accessible to all users, regardless of technical expertise.

#### **Confidence in daily operations**

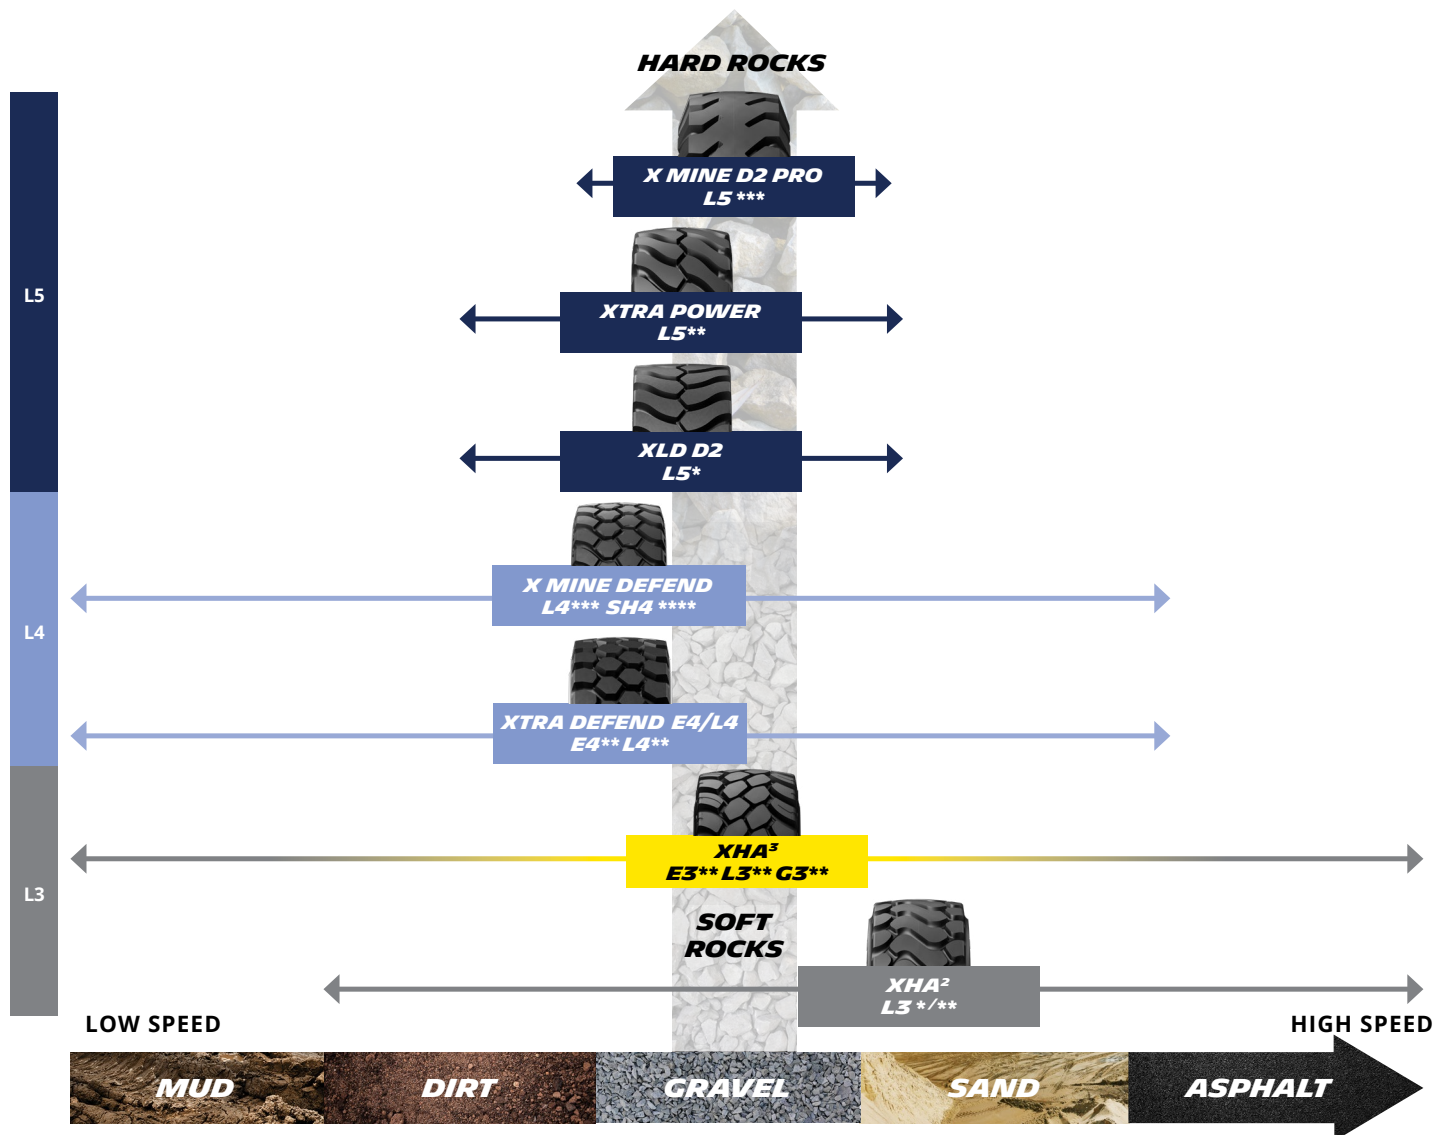

By clearly showing the correct pressure status, the *Visual Pressure Control* helps maintain the tire's lifespan and performance.

<sup>(5)</sup> Applies under load conditions.
